ABSTRACTS OF ENTOMOLOGY T.M.

ABSTRACTS OF ENTOMOLOGY is a compilation of entomological abstracts and reference citations to insect and arachnid papers derived from BIOLOGICAL ABSTRACTS and BIORESEARCH INDEX. Four indexes are included: Author, Biosystematic (taxonomic categories), CROSS (major subject concepts) and the Subject Index (permuted, keyword supplemented titles).

Each monthly issue contains abstracts from two consecutive issues of BIOLOGICAL ABSTRACTS and reference citations from one issue of BIORESEARCH INDEX. Reference numbers with the prefix 55 or 56 refer to the "Abstracts" section where the abstracts are arranged in progressive (but not consecutive) numerical order. The prefix 73 refers to citations in the "Bibliography" section, where the numerical arrangement is also progressive.

Instructions for usage precede each index. For more detailed instructions see BIOSIS' "Guide to the Indexes"* which contains a complete description of each index, or the more comprehensive instructions which preface the indexes in BIOLOGICAL ABSTRACTS and BIORESEARCH INDEX.

EXPLANATIONS OF ABBREVIATIONS USED IN BIOSYSTEMATIC INDEX

A mnemonic-type abbreviated term appears in the third column of the Biosystematic Index adjacent to each taxonomic entry. The abbreviation represents the subject heading under which the abstract or reference citation is assigned in BIOLOGICAL ABSTRACTS or BIORESEARCH INDEX and therefore indicates the type of study with which a particular taxonomic entry is concerned. Space-character requirements of the machine retrieval system used to compose and print the index make these abbreviations necessary. A complete listing of the abbreviated section headings is included for reference throughout the year. This listing will be revised and expanded when necessary and republished with each new volume.

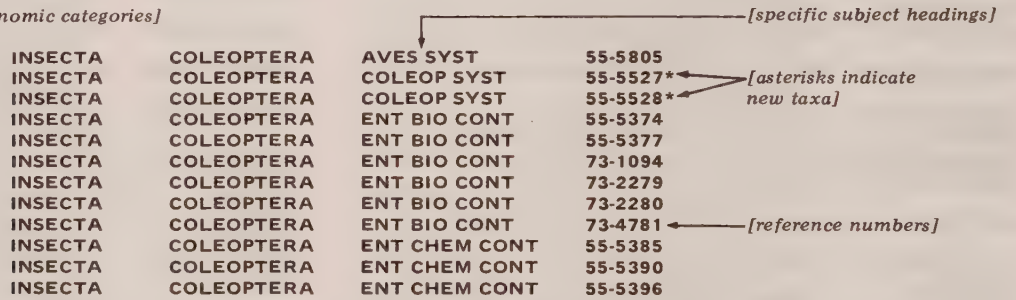
BIOSYSTEMATIC INDEX

The Biosystematic Index is composed of lists of taxonomic categories which are coordinated with specific subject headings and the abstract or reference citation numbers. Each organism(s) studied in a paper is indexed to a specific taxonomic category. The abbreviated notation printed to the left of the reference number represents the subject heading most indicative of the concepts in the paper. (See "Explanations of Abbreviations Used in Biosystematic Index" which precedes this index.) An asterisk (*) to the right of the reference number denotes one or more new taxa in the paper.

INSTRUCTIONS FOR USE:

If the reader is interested in studies on beetles, the simplest method is to search Biosystematic Index for entries under INSECTA-COLEOPTERA. The user should note the reference number and refer back to the actual abstract or reference citation.

Example:
Sample heading as it appears in The Biosystematic Index:



[taxonomic categories]
[specific subject headings]
INSECTA COLEOPTERA AVES SYST 55-5805
INSECTA COLEOPTERA COLEOP SYST 55-5527*
INSECTA COLEOPTERA COLEOP SYST 55-5528*
[asterisks indicate new taxa]
INSECTA COLEOPTERA ENT BIO CONT 55-5374
INSECTA COLEOPTERA ENT BIO CONT 55-5377
INSECTA COLEOPTERA ENT BIO CONT 73-1094
INSECTA COLEOPTERA ENT BIO CONT 73-2279
INSECTA COLEOPTERA ENT BIO CONT 73-2280
INSECTA COLEOPTERA ENT BIO CONT 73-4781
[reference numbers]
INSECTA COLEOPTERA ENT CHEM CONT 55-5385
INSECTA COLEOPTERA ENT CHEM CONT 55-5390
INSECTA COLEOPTERA ENT CHEM CONT 55-5396

Alternately, if the researcher is interested in Coleoptera used within specific types of studies, e.g., the *effective control of beetles,* he should scan the "Abbreviations Used in Biosystematic Index" (which precedes the Biosystematic Index) for the abbreviations of subject headings which most represent his specific interest, i.e., ENT BIO CONT for entomology-biological control and ENT CHEM CONT for entomology-chemical and physical control.

For additional instructions see the "Guide to the Indexes" or the instructions preceding the Biosystematic Index in BIOLOGICAL ABSTRACTS or BIORESEARCH INDEX.

THE CROSS INDEX

The CROSS (Computer Rearrangement of Subject Specialties) Index includes more than 600 biological and biomedical subject headings. The major concepts of each research article may relate to one or more of these headings. All of the abstract and reference citation numbers are arranged under each major subject heading to which they relate. Therefore, if a given abstract or reference number relates to several subjects, it will appear under as many headings or subheadings as are necessary to index that abstract or reference thoroughly.

For convenience in searches, the major subject headings and respective subheadings are alphabetized with the reference numbers arranged in six vertical columns beneath them. The prefix numbers 55 or 56 refer to the "Abstracts" sections and 73 refers to the "Bibliography" section.

Example:
Sample heading in CROSS Index:
